EDGE FAMILY

The luminaires of the type EDGE R and EDGE S are new solutions with excellent lighting parameters, allowing utilization of one type of luminaire for use both in general lighting and emergency lighting. Application of the newest technologies has allowed to create a product that combines energy saving and longer life time. The development of the LED sector has allowed obtaining better light parameters in comparison with conventional light sources at much lower operating costs. Available wattages for mains versions are from 12W to 24W and for emergency versions from 1W to 3W.

LUMINAIRE EDGE R
White polycarbonate body
Opal cover

EDGE R

This is a round version of the mains luminaires from the EDGE family. The use of different versions of the LED source allows for replacement of conventional luminaires with wattage from 80 to 150W. The design of the luminaire has been designed so as not to deviate from currently prevailing trends and to provide adequate light distribution.

LUMINAIRE EDGE S

White polycarbonate body
Opal cover

EDGE S

In order to meet the expectations set by our customers we have also designed a square version of the mains luminaire from the EDGE family.

Thanks to application of innovative solutions the luminaire meets energy requirements of the class A. The application of several wattage versions and two colours of light 4000K and 3000K allow using luminaires in offices as well as in the private sector.

THE USE OF LUMINAIRES FROM THE EDGE SERIES

The EDGE luminaires have been designed in response to the needs of the lighting market. The previous installation solutions of emergency luminaires as separated devices in the ceiling space have often been a big problem. It has become difficult to match the design of applied basic lighting luminaires with emergency luminaires. Garrabridge wanting to solve this problem has created a new type of luminaire which combines the functions of the emergency and basic lighting luminaire. The EDGE luminaires thanks to their newest technologies will find application in the most investments in lighting revitalization, especially in the private sector, investors decide to change technology to LED. In the coming years it is expected that the revitalization projects will increase fourfold.

EDGE
INSTALLING METHOD

INSTALLATION ON THE CEILING

INSTALLATION ON THE WALL

**PENDANT INSTALLATION
ON THE CEILING**

MODULAR INSTALLATION

The EDGE family luminaires are characterized by universal and simple way of installing. The socket allows installation on the ceiling and on the wall without additional accessories. The big advantage of such solution is the quick installation. In the first place the socket is mounted to the surface. Then it takes place connection of wires with a set of connectors. The final stage is to mount the shed to the previously prepared socket. The use of one socket allowed preparing a universal tubular grip for mounting EDGE luminaires to the ceiling.

EDGE
BUILT-IN MOTION SENSOR

The GARRABRIDGE company's products meet the requirements set by contemporary trends. The application of microwave motion sensor makes it easier for people with disabilities to move around the premises. Detection of the movement near the luminaire causes its activation without human intervention. An additional benefit resulting from the use of motion sensor is energy saving. Which nowadays is one of the main aspects taken into account when choosing the right lighting?

The luminaires from the EDGE family combine the function of the luminaire of the basic and emergency lighting. The specially separated emergency section provides adequate light distribution and gives the luminaire a modern appearance through its shape. The application of the 6500K light color allows to obtain higher light efficiency. There is also the possibility of using of emergency section for continuous operation as night lighting.

EDGE R

MATERIALS:

White polycarbonate body
Opal polycarbonate cover

MOUNTING:

Surface (wall, ceiling)
Optionally pendant* (ceiling)

POWER SUPPLY:

Self contained - 220÷240VAC/50÷60Hz
Central battery - 220÷240VAC/50÷60Hz; 176 - 275VDC

LIGHT SOURCE LED - MAINS OPERATION:

Power: 12W, 18W, 24W
Color Temperature: 3000K, 4000K

LIGHT SOURCE LED - EMERGENCY OPERATION:

Power: 1W to 3W
Color Temperature: 6500K

CHARGING:

BASIC: max. 24h
PREMIUM: max. 12h; energy efficient charging system

AUTONOMY AND BATTERIES:

BASIC: 1h or 3h, battery Ni-Cd 3,6V
PREMIUM: 1h or 3h, battery LiFePO₄ 6,4V

INSULATION CLASS:

II

IP RATING:

IP54

AMBIENT TEMPERATURE:

t_a: 0°C÷40°C

OPTIONS:

- SE - LED emergency section - non maintained
- SA - LED emergency section - maintained (night lighting)
- AT - autotest
- PT - manual test button
- RU - Rubic UNA central monitoring
- RW - Rubic UNA Wireless central monitoring
- CB - central battery

ADDITIONAL INFORMATION:

LED indicator signalizes mains power supply and battery charging
Deep discharge protection
Optional fixtures with MCR motion sensor.
Possibility of using the emergency section for continuous operation as night lighting.
*requires an accessory for pendant mounting

Dimensions (mm):

Parameters in emergency operation:

L1 - distance of the luminaire from the wall
L2 - distance between luminaires
h - height
